WATERING TO THE PLANTS IN THE CAMPUS

Conducted on
(14.06.2022)

Venue
Besides Arts Block

Organized by
DR T Srinivas
Coordinator, NSS
&
Sri S Saravana
CTO, NCC
SRGDC
Punganur

Objectives:

- To enhance the overall aesthetic appeal of the college campus by maintaining a lush and green environment through regular watering of plants.
- Promote a sense of environmental responsibility and awareness among the college community.
- Contribute to the ecological balance within the campus by supporting the growth and well-being of various plants.
- Provide a conducive and pleasant atmosphere for students, faculty, and visitors, fostering a positive and healthy campus environment.

REPORT

Title: WATERING TO THE PLANTS

Date: 14.06..2022

Time: 03.30 P.M.

Venue: Besides Arts Block

On 14.06.2022, a concerted effort to care for the greenery on our campus took place under the leadership of Dr. T Srinivas, NSS Programme Officer. The initiative involved the active participation of NSS volunteers and NCC cadets, contributing to the well-being of our campus plants. The event was graced by the presence of Dr. Y Rajasekhar, who presided over the initiative, and K. Nandeeswaraiah, Vice-Principal, who also actively participated. The volunteers and cadets, under the guidance of Dr. T Srinivas, dispersed across the campus with watering cans and hoses. They systematically watered each plant, paying attention to both flowerbeds and potted plants. This hands-on approach allowed participants to actively engage with the greenery on our campus. K. Nandeeswaraiah, Vice-Principal, actively contributed, setting an example for the entire students and faculty. The campus plant watering initiative was a successful and collaborative effort. The event not only contributed to the well-being of our campus plants but also strengthened the sense of community among participants. The programme concluded with the serving of refreshments to the participants.

Outcomes:

Students will learn

- To contribute to a more balanced ecosystem.
- That the presence of well-maintained plants contributes to improved air quality.

- That a green campus can positively impact the mental well-being of individuals, promoting relaxation and stress reduction.
- That the watering program provides an opportunity for students, faculty, and staff to actively participate in environmental stewardship and community building.
- The program helps to raise awareness about sustainable practices and the interconnectedness of human activities with the environment.
